

# Fred L.M. Pattison

(1923-2010) Fred Pattison was born in Scotland, where he received his early education. He enrolled at the University of Cambridge in England in 1941 to study Natural Science. Fred remained there to obtain a PhD. in Organic Chemistry under the supervision of Dr. B.C. Saunders. He then moved to Halifax, Nova Scotia to lecture at Dalhousie

University of Alberta, Edmonton, Alberta, Canada. He was a member of the Royal Society of Canada and the Royal Society of Chemistry. He was also a member of the Canadian Chemical Society and the American Chemical Society. He was a recipient of the Order of Canada and the Order of Nova Scotia. He was a recipient of the Distinguished Service Award from the University of Cambridge and the Distinguished Service Award from Dalhousie University. He was a recipient of the Distinguished Service Award from the University of Alberta and the Distinguished Service Award from the University of Saskatchewan. He was a recipient of the Distinguished Service Award from the University of Toronto and the Distinguished Service Award from the University of Waterloo. He was a recipient of the Distinguished Service Award from the University of British Columbia and the Distinguished Service Award from the University of Victoria. He was a recipient of the Distinguished Service Award from the University of New Brunswick and the Distinguished Service Award from the University of New Brunswick. He was a recipient of the Distinguished Service Award from the University of New Brunswick and the Distinguished Service Award from the University of New Brunswick.

Lecture I  
Putting the Fun Back Into  
Fundamental Hydrocarbon Chemistry

Tuesday, May 23, 3:00 pm  
Room 3250, 3M Centre

The two simplest branched acyclic structures comprising only conjugated C=C units were first reported in 1955 and 1962, respectively. No higher members of the series were described in the literature until we reported them in 2000. Before we prepared them,
