Written multiple choice exams will be graded using the Scantron system. Multiple-choice exams may be examined by computer software to check for unusual coincidences in answer patterns that may indicate cheating. Lab practical tests will be in a "bell-ringer" format. More information about the bell-ringer format will be given in lab and lecture prior to the first lab practical. The written exams are cumulative within each term, not across terms. The breakdown of questions will reflect the material covered. (ie. Dec written will be 50:50 back/upper and lower limb; the April final will be 50:50 head/neck/thorax and abdomen/pelvis.) Online case quizzes may be attempted by all but they will only count toward the OT student grades.

B. Special Examinations

A Special Examination is any examination other than the regular examination, and it may be offered only with the permission of the Dean of the Faculty in which the student is registered, in consultation with the instructor and Department Chair. Permission to write a Special Examination may be given on the basis of compassionate or medical grounds with appropriate supporting documents.

A Special Examination must be written at the University or an Affiliated University College no later than 30 days after the end of the examination period involved. To accommodate unusual circumstances, a date later than this may be arranged at the time permission is first given by the Dean of the Faculty. The Dean will consult with the instructor and Department Chair and, if a later date is arranged, will communicate this to Registrarial Services. If a student fails to write a scheduled Special Examination, permission to write another Special Examination will be granted only with the permission of the Dean in exceptional circumstances and with appropriate supporting documents.
