Course Description

This course provides an introduction to the sociological analysis of sport and physical activity. It introduces a framework for the critical reflection on the social factors that influence our experiences in sport and that shape our sports biographies. The framework relates societal institutions (media, the economy, politics, etc.) that influence sports, to individual factors, for example, gender, social status, race, and ethnicity. The application of this framework to our everyday experiences in sports allows us to reflect on sport as a socially constructed practice which may change over time.

Learning Outcomes

Upon completion of this course, students will be able to:

1. explain the relationships between various societal institutions and sport (*knowledge*);
2. explain how various social determinants and biographical factors affect sports practices (
