Office Room Number: HSB219
Office Hours: Wednesday, 1 3pm

Course Meeting Times: Wednesday, 12:30 2:30 p.m., Friday, 1:30 2:30 p.m.

Location: SH 3315

### Prerequisite Checking

Unless you have either the requisites for this course or written special permission from your Dean to enrol in it, you may be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites. Please refer to the Western's current Academic Calendar at www.westerncalendar.uwo.ca.

### **Course Information**

This course examines the complexities of aging from a psychological perspective and provides students with learning opportunities to examine psychological theories of aging, the mind body connection, strategies to optimize cognitive vitality with advancing age, and common conditions associated with aging such as Alzheimer's Disease and other related dementias.

**Learning Outcomes**: Participation in this course will enable students to:

- 1. Describe the effects of aging processes on psychological functions (e.g., memory, intelligence, personality);
- 2. Compare patterns of normal aging with patterns of psychological dysfunction in later
- 3. Describe mental health changes that occur with normal and pathological aging.
