Course Objectives and Student Learning Outcomes

readers make informed decisions. A strong policy brief distills research findings in plain language and makes clear policy recommendations. The best policy briefs are clear and concise stand-alone documents that focus on a single topic: <https://www.idrc.ca/en/how-write-policy-brief> (Please look under the Assignments tab on OWL for a sample policy brief).

Using Generative AI Language Apps

produce text based on a predictive model as to what word is most likely to come next. When asked to write an article or book, the AI may invent articles and books. You may find yourself citing a work whose author and title are complete fictions; more often, the AI attributes its imaginary research paper to a real scholar, but not necessarily one who even works in the area. Using a Generative AI app may seem like an easy way to manage your time or to simplify your workload, but if you use it without acknowledging that you are doing so, you are cheating. You are also depriving yourself of the value of education, since by using ChatGPT you are not building your own skills in critical thinking, research, or communication, all of which are areas of significant interest to potential employers. In brief, if you use a Generative AI app to help with your assignment, you must identify every part of your assignment that you did not write yourself. Anything else is a violation of academic integrity and subject to all the same penalties as more traditional types of plagiarism. If ChatGPT use is suspected, you may be asked to show your rough work, to answer questions about your sources and your research process, and to explain your
