Approved with amendments.

Approved

Respiratory illnesses season continues, campus community members are reminded of best practices for hand hygiene and illness management. Health, Safety and Well-Being provided updates to the WorkSafe@Western platform development is continuing for radiation safety module. Committee was advised the Canadian Nuclear Safety Commission will be inspecting Western in February

Procedural documents for biological safety committee are being revised as part of the updates for health and safety policy updates.

Winter weather hazards are possible this time of year. Community members are reminded to report hazardous conditions to Facilities Management and be aware of slip and trip hazards in outdoor areas.

Facilities Management described the work that is done in the winter maintenance plan to keep campus operational. Each snow and weather event is unique and can be required at all hours.

Two critical injury incidents were reported to the committee.

A review of the finding from the 2023 inspection schedule was presented.
A draft schedule for the 2024 inspection schedule for the JOHSC was shared.

Reportable Items.

- 12 orders are open for action.
- 12 items are past due from previous inspections.

None to report.

None to report.

None to report.

Western Special Constable Service reported on some initiatives to maintain a safe campus. These include contracted security personnel and an increase in daytime schedules for constables.

Facilities Management presented rationale for a varied procedure for fan filter changes in the 14 asbestos containing buildings.

FM work procedures (WP-57) for this are currently under review and steps to maintain worker safety were presented to the committee.

Facilities management presented information from third party reporting to support the use of a varied procedure.

Committee consensus was that a varied procedure can be developed as part of the updated WP-57 that is under revision with Facilities Management.

Inspectors from the Ministry of Labour were on site for investigation of critical injuries. Procedures for reporting critical injury were discussed and opportunities to improve the process are to be looked at by Health Safety and Well-being in partnership with all stakeholders on campus
