

Searching the ChemWatch Database

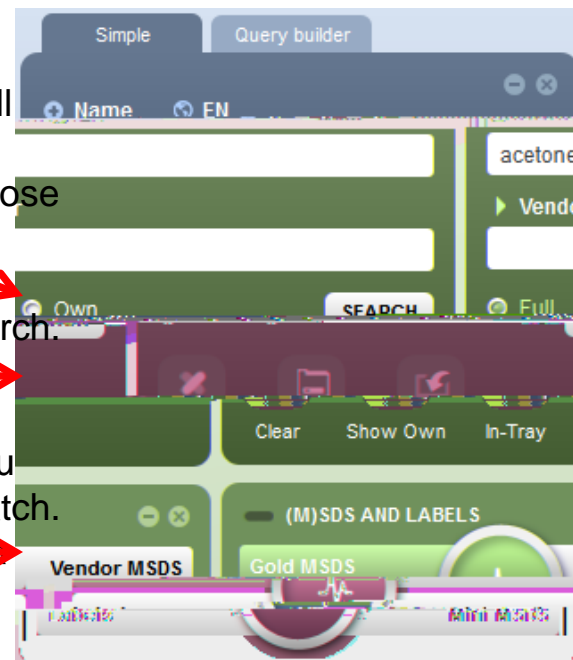

Searching the ChemWatch Database

Full versus Own If you would like to search for a chemical within the full ChemWatch database, select “Full”. If you would prefer to only search through those SDSs that have been saved in your folders, you will choose “Own”.

Clear Be sure to clear any previous search before initiating a new search.

Gold MSDSs Vendor MSDS Be sure to select the type of document you wish to see. Gold MSDSs are very detailed SDSs written by ChemWatch. Vendor MSDSs are PDF documents written by vendors such as Sigma Aldrich, Fisher Scientific, etc.

Searching on other fields You may also choose to

Searching the ChemWatch Database

Understanding the Search Results In the following example, I searched for Acetone by SigmaAldrich US I searched in the Full database and selected Vendor Sheets as the report type.

The list that appears is a list of chemicals (individual documents) resulting from my search, with the closest match at the top. You can see that the first hit has “100% Relevance” in the Relevance column. Once I click on that chemical name, I will see a list of vendor sheets for that chemical. This will be shown on the next slide.

Clicking on the track symbol  will allow you to see where this SDS is stored in your folders.

Clicking on the part numbers symbol  will allow you to assign your organization's part number to that chemical.

The gold ALS symbol  indicates that there is a Gold SDS written by ChemWatch for that chemical. If you hover your mouse over one of the materials with a Gold SDS, a pop-up will appear with the ChemWatch number for that chemical.

Searching the ChemWatch Database

Getting a list of documents To get the list of documents associated with a chemical, click on the Material Name the chemical you are looking for. In the example here, I selected Vendor MSDS, and I have “Latest Documents only” selected, so I will get the latest vendor sheet for acetone made by Sigma. If I uncheck “Latest”, I will see all documents for acetone by Sigma.

Click on the chemical name to see that particular SDS.

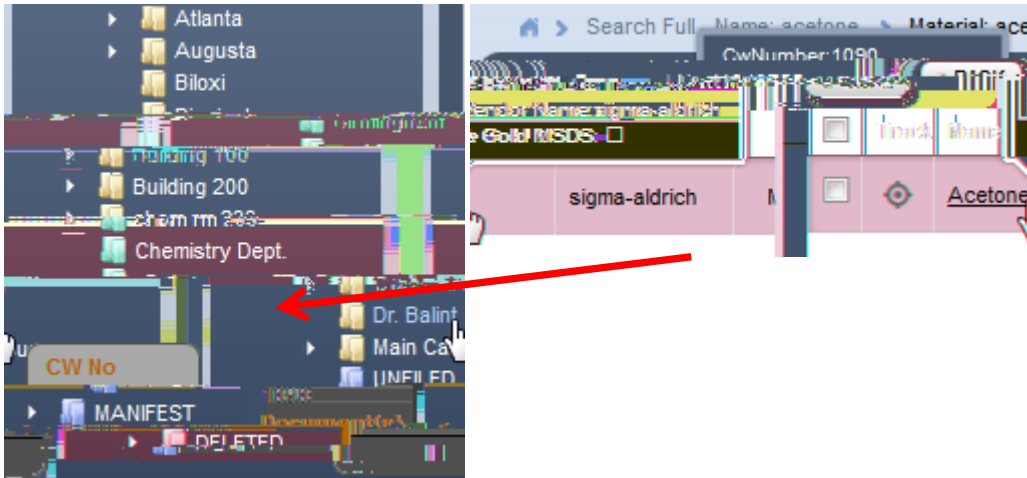

The screenshot displays the ChemWatch database interface. At the top, a search bar shows the material name 'acetone' and the vendor 'Sigma-Aldrich(United States)'. Below the search bar, a table lists search results. A red arrow points to the first result, which is highlighted. The table has columns for Track, Part N, Name, Vendor, Type, Language, Country, Source, and Issue Date.

Track	Part N	Name	Vendor	Type	Language	Country	Source	Issue Date
1000	English	States	Sigma-Aldrich	Acetone	English	United States	sigma aldrich	10/02/2013

Below the table, the selected document is displayed. The document is titled 'SIGMA-ALDRICH' and is Version 3.13. The revision date is 10/02/2013 and the print date is 01/06/2014. The document includes a section for 'UNDO COMPANY IDENTIFICATION' and '1. PRODUCT IDENTIFICATION'. The product name is 'Acetone' and the product number is '6505'.

Moving the selected SDS to a Folder

Drag and Drop Once you have found the SDS you are looking for, use your left mouse button to “drag and drop” it into the folder where you would like to store the SDS.

Copy and Paste Alternatively you can use your right mouse button to copy and paste. Rightclick on the material name, choose “copy”, then right
