 Persons Contacted: 1

Boardroom - Support Services
 Chemistry Building

MLTSD was contacted regarding the following:
 - A number of eyewash stations in the Chemistry Building, which are supposed to be tested and inspected on a weekly basis have not been tested and inspected in many weeks.

INSPECTOR'S OBSERVATIONS:

- Picket line in place at time of arrival. Spectator contacted advised that there are approximately 1100 eyewash stations on campus. It was stated that the remaining 35% of the eyewash stations on campus are in the process of being inspected. A plan to have the remaining stations inspected in the corridors of the Chemistry Building. The temperature and pressure/bark of the water and the presence of inspectors were functioning.
